Vanquish the Sizzling Mile in **Telemedicine**

What is Telemedicine?

The new era of Telehealth, Telemedicine is widely promoting a long-distance evaluation, diagnose treatments and administration amenities by utilizing telecommunication technologies to support and manage consumer requirements.

This electronic dissemination apparently helps in bridging interpersonal coordination between the provider and the consumer, patient's custody experience, and reduce health centers admissions and fetching of cost without an in-person visit.

The striking evolution of our healthcare infrastructure is ruling over chronic conditions, expert consultation medication management & other clinical services that are hosted remotely via secure video and audio connections.

Our Telemedicine software is embedded in applications like follow-up visits, remote incurable disease management, distant post-hospitalization care, preventative care support, school-based telehealth and assisted living center support.

WORKFLOW SHOWCASE

We fabricate important care features to interpret clinical operations on telemedicine platform. The provision of different management for web and mobile application portrays a contrasting outlook and arresting vision to the flow of our flawless application.

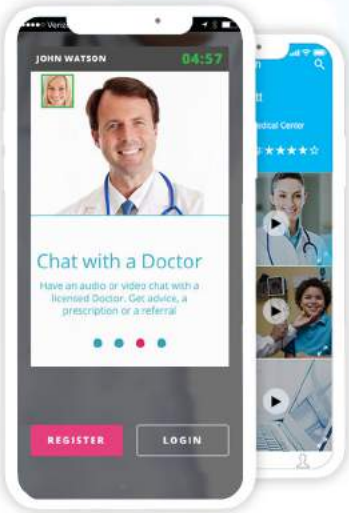
PATIENT MANAGEMENT

Through the patient gateway, the patient will be adroit to board the following features with just a touch.

- A Panel of Doctors by Speciality
- Accessibility of self-health records
- Instant Chat, Video/Audio Consultation
- Easy-peasy installation with robust user experience

WEB PORTAL FEATURES

+ Easy Sign Up
+ Manage your Health Records
+ Secure Real-Time Messaging
+ Trouble Free Appointment Booking
+ Swift History Updates
+ Multiple Payment Options
+ Multi-Party Video Conferencing
+ Remote Monitoring & Health Trackers



MOBILE APPLICATION

+ Register and Use
+ Avail Instant E-prescriptions
+ Manage your personal Health Kit
+ Freezing Hassle Free Appointments
+ Reviews and Ratings
+ Audio/ Video Conferencing
+ Remote Process Management
+ Mobile Notifications and Alerts

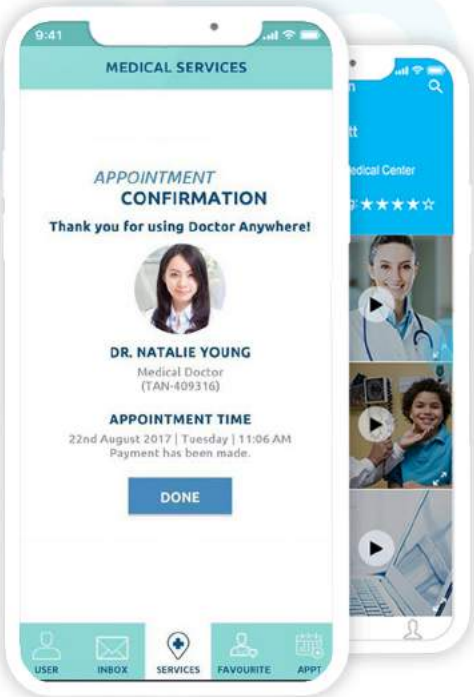
PROVIDER MANAGEMENT

Our astonishing features for doctor doorway, Healthcare providers can access these features on-the-go with our virtual practice application.

- Hassle-free authentication
- Diagnostic Tools Integration
- Convenient Post-Acute Care Settings
- Real-Time Chat, Video/Audio Consultations
- Integration Of Patient's Electronic Health Records

WEB PORTAL FEATURES

+ Secure registration process
+ Simple Vision & Scheduling of Appointments
+ Worker's Compensation
+ Patient Charting/EMR
+ Doctor's Availability Updates
+ Multi-Party Video/ Audio Conferencing Sessions
+ Referral Management/Claim Management
+ Direct e-Prescriptions and Notes on Immediate Messaging



MOBILE APPLICATION

+ Seamless Onboarding
+ Facile flare-up to Patient account
+ Instant Chat, HD Video/ Audio Consultations
+ Appointment Management
+ Effortless Sharing of E-Prescriptions and Notes
+ Receiving Alerts and Reminders
+ Billing Management
+ Help Desk for instant Healthcare Queries & Questions

Telemed Platform

SECURITY PARAMETERS

Your Database and Communications are completely Secure and feasible

Our software, hardware & networking area is consoled by HIPAA- and HITECH- compliant data hosted at Google cloud and AWS that archive and manage the catalog of all the documentation procedure.

The transit security is encrypted with AES-128 bit SSL at the database layer by utilizing hashed out techniques for transferring sensitive data to prevent leakage of valuable information.

End-to-end video feed security is protected with AES-128 encryption and supports CSK and Cryptographic Security Kernel.

Our technology is sheltered at a SSAE 16 SOC I Type II, PCI, HIPAA- and HITECH- compliant data center.

We accommodate our mechanization with multiple servers for stabilizing which helps in load balancing in case of any downtime happens.
